Gemini

Consult the official Gemini help .

Gemini

It is Google's AI tool. It has a generalist orientation and could be compared to OpenAI's ChatGPT, although with a different architecture that allows it to perform more complex tasks thanks to multimodal reasoning.

It allows the **generation of original content (text, images, audio, video, programming code)** , in response to requests or instructions (*prompts*) and based on information obtained from large amounts of data (LLM) in multiple formats.

The UPF provides you with a **licensed** version , which **prevents your data from being used to train other models** , thus **preserving its confidentiality** and offering better protection.

How can it help you?

- **Creative text generation** : help write texts, reports, poems, scripts, emails and more.
- **Language translation** : Allows you to translate text from one language to another with high accuracy.
- **Text summarization** : Summarize long documents into shorter paragraphs.
- **Answering questions** : Answering questions in an informative and complete manner.
- **Code generation** : generate code in different programming languages.
- **Content creation** : generate content, images, video, audio for websites, blogs and social networks.
- **Analyze content** in different formats such as text, images, code and others.
- It can **adapt to different** writing styles and voice tones.
- Gemini's *Deep Research and Gems* functionality allows you **to collect**

large volumes of data, **identify** complex patterns and **extract** *gems* or key insights that are not initially obvious and **generate** personalized reports that

How to access it?

You will find it in the **Google Workspace** menu , like the rest of the Google services that UPF makes available to you when you use your Google UPF account.

Data deletion policy

Gemini UPF does not allow you to delete conversations. All conversations are kept on the platform for 18 months and then automatically deleted, including those that are pinned. If you want to save a conversation, you can export it to a drive document or download it and send it by email.
